

Remote Access weil technology V1.5

necessary information

LAN:

IP-Adresse
Network mask
Default gateway

Option WLAN:

SSID
key

Option Proxy:

address
password

GSM (SIM-card delivers customer):

Provider / APN
PIN

The SiteManager will set up an **outgoing** VPN-connection with firewall to the GateManager. Therefor we need a standard connection to the internet with the TCP-ports **80** und **443**.

Please enter the necessary information for your connection in the yellow box and send the document back to weil-technology. For further questions please contact Rainer Bahlinger (r.bahlinger@weil-engineering.de, Tel: +49 7631/1809-558).
